(54) CD STORAGE BODY

(57) Abstract:

PROBLEM TO BE SOLVED: To protect a stored CD, and in particular, to prevent a recording surface of the CD from being damaged while a package of envelope type is used.

SOLUTION: A protective sheet 30 is stored in a flat, paper bag body 10 together with a CD 20 so that the protective sheet 30 is abutted on a recording surface of the CD 20. Because the protecting condition of the CD 20 is improved, accidents of breakage are reduced in number in handling the CD while it is carried, and the recording surface of the CD 20 is prevented from being damaged. The cost can be reduced by using a foamed sheet as the protective sheet 30, and printing is possible thereon, and the range of choices of the design can be extended.
